### Safety Standards:

The still ongoing pandemic continues to require appropriate hygiene measures. We ask all guests to have a complete and still valid vaccination. Also, you should wear, at least, a medical mask or, preferably, an FFP2 mask, especially in places with reduced distance to others. We will provide self-tests to all our guests before the workshop starts. Therefore, please allow sufficient time before the start of the first presentation. Of course, you can personally decide to take precautions above this standard. We will, if necessary, adjust these measures to reflect the current pandemic situation as of the event day. Thank you for your understanding and support.
