17:45 – 18:05	Albert Newen (RUB)	Other funding opportunities
18:05 – 18:30	<i>General Discussion</i>	Pros and cons of an academic career path

Description:

Striving for a career inside academia is a peculiar and challenging endeavor. The educational path is about the longest there can be and one needs to be prepared for numerous unforeseeable hurdles and uncertainties. Surely, professional scientists in public and private research facilities are usually quite free to choose their topic of interest, they commonly enjoy a liberal working schedule, and they benefit from a secure social protection and many support programs by their employers. But these benefits often come with many personal restrictions and sacrifices on a highly contested job market for those few permanent positions. One should think twice whether the pros actually outweigh the cons – which is the dilemma we will address in this session.
