

# Empirical Investigations of Situating Cognition

Workshop in Cognitive Science & Philosophy

**Alice Auersperg**  
VetMed University Vienna

Breaking New Ground: Innovation  
in Birds Primates and Human Infants

How Early Inter-Personal Interaction  
Dynamics Drive Attention and  
Intentional Communication

**Sam Wass**  
University of East London

**Tobias Meilinger**  
University of Tübingen

Situating Cognition in Real  
and Virtual Spaces

About General Perspectives in Science:  
Dealing with Structural Injustice  
at the University

**Anna Welpinghus**  
Bielefeld University

**June 6 & 7**  
2024

Osnabrück University  
Botanical Garden, Bohnenkamp-Haus

How are problems solved in non-human animals? What can developmental trajectories tell us about later cognitive abilities? How does cognition differ when in virtual versus real space? Questions like these, as well as perspectives on them, are the focal point of this workshop to explore recent topics currently dealt with within and outside of our Research Training Group 'Situating Cognition'. Additionally, a starting seminar and a talk will provide insights and guidance about structural injustice at university.
