Description: The sphere of imagination holds much to be discussed, be it its role in creativity, gaining knowledge and its connection to mind wandering. Furthermore, evidence from aphantasics potentially challenges some of our views about imagination and the role of mental imagery. What is the nature of imagination, what is its epistemic role? Is it fruitful to let our minds wander? What are implications of limited imaginative abilities? We will take a closer look at what current situated research is uncovering in the specific field of imagination.
